Plateforme VIP

Sorina Pop
7^{ème} Workshop VIP
03/06/2020

Programme

- ✓ Très courte introduction et présentation du programme (Sorina Pop, 5 min)
- Tour de table, présentation des attentes de chacun (tous, 30 min)
- Nouvelles de VIP (Sorina Pop, 15 - 20 min)
 - organisation, dernières releases et applis, projets en cours/à venir, recommandations
 - point sur l'utilisation des GPUs
 - infos sur la possibilité d'utiliser le cluster de Creatis
- Girder et VIP (Axel Bonnet et Frédéric Cervenansky, 10 - 15 min)
 - exécution des pipelines VIP depuis Girder
- Mise en place d'une BD FAIR provenant de PLoT et interconnectée avec VIP (Obéd Meralus et Laurent Mahieu-Williame, 10 -15 min)
- Divers

Web portal

Application as a service
File transfer to/from grid

Scientific applications

Cancer therapy simulation

Prostate radiotherapy plan simulated with GATE (L. Grevillot and D. Sarrut)

Neuro-image analysis

Brain tissue segmentation with Freesurfer

Image simulation

Echocardiography simulated with FIELD-II (O. Bernard *et al*)

Modeling and optimization of distributed computing systems

Acceleration yielded by non-clairvoyant task replication (R. Ferreira da Silva *et al*)

Infrastructure

Supported by EGI Infrastructure
Uses biomed VO (~65 sites in Europe and beyond)
VIP consumes ~20 CPU years every month

France-Grilles

Users

1000+ registered users in June 2018
55 publications since 2011

Why use VIP?

- To get/give access to medical imaging applications
 - No need for installation on the users' side
 - Easy to use
- To share
 - Applications and data
- To get access to distributed computing and storage resources
 - « Free » of charge for research usage
 - Moral obligation to report publications using these resources

People

■ VIP team

- Sorina Pop, IR CNRS
- Axel Bonnet, IR CNRS (FLI & CNRS INS2I)
- Frédéric Cervenansky, IR Université

■ Creatis research teams' members

- All Creatis teams were represented by at least one person
- See meeting reports at <https://www.creatis.insa-lyon.fr/site7/fr/vip>

■ Students

- Obed Meralus (Labex Primes WP5) – Master thesis : May – September 2020
- Anchen Chai (Labex Primes WP5) – PhD defended in January 2019

■ External collaborations

- Tristan Glatard, Associated Professor at Concordia University, Montreal
- Frédéric Suter, CC-IN2P3

VIP platform latest actions

■ VIP software development

- Latest VIP release v1.28 from May 2020

■ Latest applications imported & user support

- Epilepsy deep learning tools (Carole Lartizien / Daria Zotova)
- Mixed workflows of SPM preprocessing tools (Carole Lartizien / Julien Jung)
- Segmentation of the thalami of the premature infant in cUS - mlvl_Inference (Philippe Delachartre)
- Synthetization of a pseudo attenuation map - Max_prob (Inés Mérida, collab CERMEP)
- Simulateur 3D PROCHIP (Carole Frindel / Ali Ahmad)
- Algorithmes de reconstruction (Voichita Maxim / Thomas Grenier)
- Autodock (Covid19)

■ Communication

- Multiple conferences (JCAD, EGI, MIPRO...), 2 EGI articles
- 6 VIP workshops (one every 6 months): <https://www.creatis.insa-lyon.fr/site7/fr/vip>

■ Answer the needs expressed during the workshops

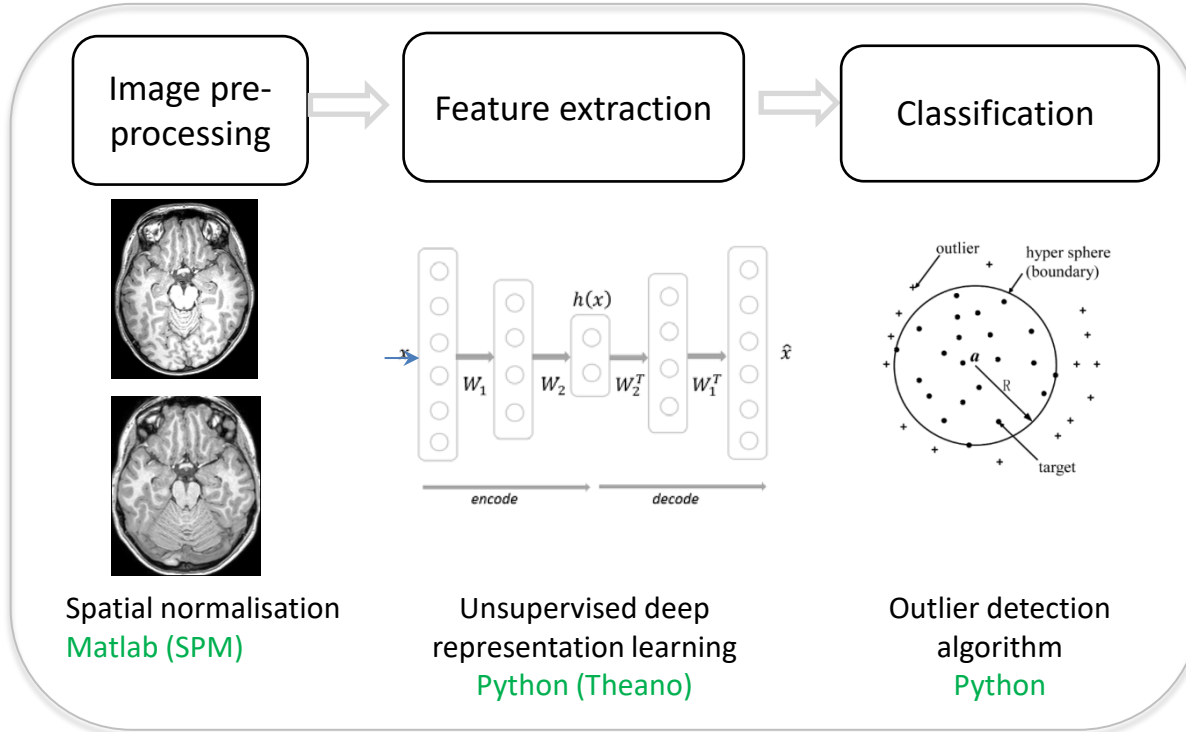

- GPU usage
- VIP – Girder integration

GPU integration

MR (T1/FLAIR) and TEP database:

- 80 normal subjects
- 25 epilepsy patients

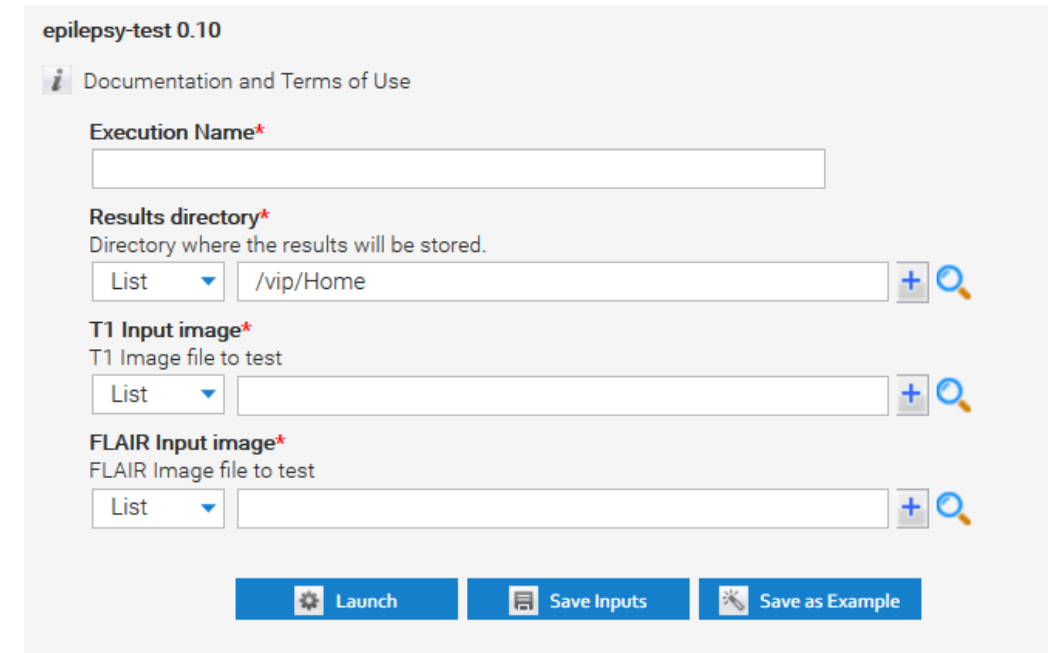

Projet Carole Lartizien
 - Papier “ Exploiting GPUs on distributed infrastructures for medical imaging applications with VIP and DIRAC.” S. Pop et al., MIPRO 2019

Crédits: Carole Lartizien, PhD work of Zara Alaverdyan (Oct 2015-Oct 2018)

Current usage

- The training is run and the model is generated beforehand, then made available on VIP
- End users launch test jobs from VIP
 - Workflow with SPM pre-processing and test applications
 - Use of Docker containers

epilepsy-test 0.10

Docker containers

- A Docker **image** is an executable package that includes everything needed to run an application--the code, a runtime, libraries, environment variables, and configuration files
 - Useful for sharing and deploying your application on any platform
 - No need for installation (other than Docker)
 - Helps with reproducibility (to a certain extent)
 - Usually quite straightforward, except for GPUs...

Using the Creatis cluster

- Aim : use the GPUs, data and software already available
- Challenges
 - Access rights : restricted to creatis users
 - OS : Fedora
- Since May 2020, VIP can launch executions on GPUs from the Creatis cluster
 - Main current limitation : use of a single account, data access rights

VIP as a platform

- Organisation
 - Responsable : Sorina Pop
 - Comité de pilotage : O. Beuf, H. Benoit-Cattin, J. Pansanel (IPHC Strasbourg)
- Recommendations
 - Don't hesitate to contact us
 - Understand your needs and propose an adequate service
 - Include VIP in your projects
 - Contact us before submitting the project

Programme

Application publishing in VIP with Boutiques

- Share your tools in a packaged and fully described fashion
- Boutiques publishes descriptors to Zenodo (<https://zenodo.org>)
