

Visualize Metabolism As It Happens

New Horizons in Hyperpolarized MRI

See metabolic processes in living organisms as they happen in real time with spatial resolution using metabolic imaging agents for MRI.

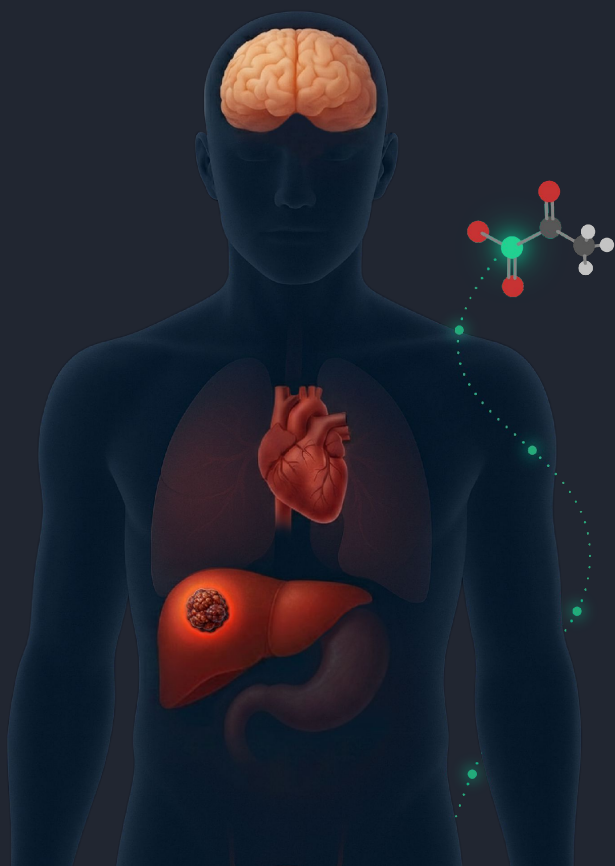

Join us for an introduction to hyperpolarization and how it enables the use of carbon-13 labeled compounds for metabolic imaging.

Myriam Chaumeil, Ph.D.
Head of HP MRI Research

Simon Bennett, Ph.D.
Head of Sales Europe

14:00-15:00, November the 3rd
Auditorium of the Irène Joliot-Curie Building
Coffee, Tea and Pastries Provided
