

# Projet Transversal VIP

## Introduction et nouvelles

3<sup>ème</sup> Workshop VIP  
21/11/2017

# Programme

- Introduction et nouvelles de VIP (Sorina)
- Tour de table
  - Activités et intérêts en lien avec VIP
- Courtes présentations
  - Girder (Frédéric)
  - Simus et école d'hiver (Olivier)
  - ...
- Discussions

Application as a service  
File transfer to/from grid

Simulation

FIELD-II v0.4    PET-Sorteo v0.2.2    SIMRI object and c...    SIMRI v0.3

**Scientific applications****Cancer therapy simulation**

Prostate radiotherapy plan simulated with GATE(L. Grevillot and D. Sarrut)

**Image simulation**

Echocardiography simulated with FIELD-II (O. Bernard et al)

**Neuro-image analysis**

Brain tissue segmentation with Freesurfer

**Modeling and optimization of distributed computing systems**

Acceleration yielded by non-clairvoyant task replication (R. Ferreira da Silva et al)

**Infrastructure**

Supported by EGI Infrastructure  
Uses biomed VO (~65 sites in Europe and beyond)  
VIP consumes ~30 CPU years every month

**Users**

1000+ registered users in Nov 2017  
39 publications since 2011

**France-Grilles**

## Why use VIP?

- To get/give access to medical imaging applications
  - No need for installation on the user's' side
  - Easy to use
- To share
  - Applications and data
- To get access to distributed computing and storage resources
  - « Free » of charge for research usage
    - Moral obligation to report publications using these resources

# People

## ■ VIP team

- Axel Bonnet, IR CNRS FLI
- Pascal Girard, IR CNRS FLI -> INSA Lyon, CITI
- Frédéric Cervenansky, IR Université
- Sorina Pop, IR CNRS

## ■ Creatis research teams' members

- <https://www.creatis.insa-lyon.fr/logs/mailman/transverse-vip/>

## ■ PhD student

- Anchen Chai (Labex Primes WP5)

## ■ External collaborations

- Tristan Glatard, Associated Professor at Concordia University, Montreal
- Frédéric Suter, CC-IN2P3

# VIP transverse project latest actions

## ■ VIP software development

- VIP version 1.21 released on June 23<sup>rd</sup> (<https://github.com/virtual-imaging-platform/VIP-portal/releases/tag/1.21>)
- API, API client and tests – 2 internships
- Bugs and features

## ■ Support actions

- User support on existing applications (Coil Characterization, Freesurfer ...)
- General advice (Docker, distributed computing)

## ■ Communication

- JFR -> FLI Stand in the Innovation Village
- Succes Days -> Talk on interoperability

## ■ Upcoming

- Data upload and GateLab applets to be replaced with JavaScript code
- Access databases such as Creatis Human Heart DB through the API

# FLI-IAM: a platform of platforms

- Interoperability among
  - Image Databases
  - Processing platforms

## National and international projects

- FLI (France Life Imaging) – IAM node
  - Application porting & API
  - Phase II – VIP commercial offer (long-term sustainability)
- Labex Primes WP5
  - Anchen Chai's PhD thesis -> simulation for data transfer optimization
- INS2I platform support
  - IR NOEMI
- FG-SOL
  - Based on VIP, services to all French communities (beyond medical imaging)
- OpenAire Connect
  - European project, 11 partenars among which CNRS -> FLI -> Creatis
  - Facilitate adoption of OpenScience Publishing
    - VIP: publish experiments (with DOIs)

Thank you  
for your attention!

Questions ?
